Time & Cost Map

Connect the dots (dollars · hours), and see if a railpass will save you money. The **first number** between cities = approximate cost in \$US for a 1-way, 2nd class ticket. The **second number** = number of hours the trip takes. Important: These fares and times are based on the Eurail Tariff Guide. Actual prices may vary due to currency fluctuations, season and local promotions. For approximate 1st class rail prices, multiply the prices shown by 1½. Travel times and fares are for express trains where applicable. For shorter routes, see the many individual country rail maps we have later in this guide.
